- Get an up-close look at our Training Center
- Learn about how skilled trades are contributing to the Nuclear Industry

Be sure to:

- Bring your resume
- Complete an application

Employment Opportunity:

Boilermaker Helper Program

Boilermaker Helper Program

Boilermakers - Local 128, Aecon and Ontario Power Generation have partnered to develop a Boilermaker Helper Program to support ongoing work on the Darlington Refurbishment Project with Ontario Power Generation.

About the Program

The Helper program is open to individuals without Boilermaker qualifications or experience who are interested performing short term, physically demanding work on a major nuclear project at the Darlington site.

This is an opportunity to work directly on OPG's site, in the reactor vault, at a competitive pay rate while gaining real exposure to working in the field. This labour-intensive work will include exposure to permissibly high levels of radiation. It is important to recognize that all radiological workers receive extensive training and are only subject to exposure levels within approved Federal guidelines and policies.

What is offered?

- Paid onsite training
- Experience working alongside trained Journeypersons
- OPG Site experience
- Being part of a team on a large-scale construction project

Eligibility

- 18 years of age or older
- Pass an OPG security clearance check
- Safety first attitude
- Adhere to OPG and Aecon's safety standards and core values
- Excellent attendance and adherence to work a rotating shift schedule
- Ability to successfully pass training
- Valid driver's license or access to transportation to work at Darlington
- Physical strength and stamina
- Ability to work at heights
- Foster a collaborative and positive work atmosphere

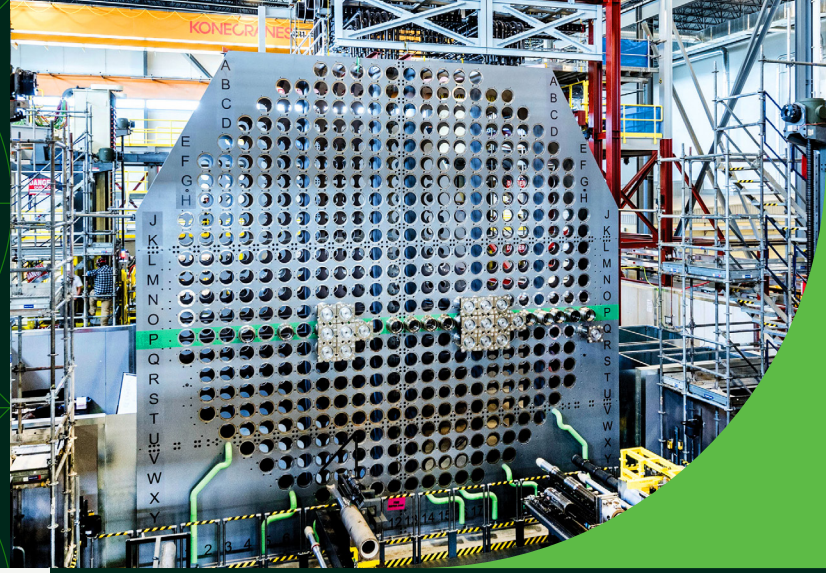

Apply directly at apply@ibblocal128.org with an attached resume highlighting your interest in the Boilermaker Helper position.

Employment Opportunity: **Boilermaker Helper Program**

Application Period

Open now until May 1, 2023

Apply by submitting your resume to
apply@ibblocal128.org

Selection Committee Interview

March, 2023 – May 1, 2023

Approved candidates will be contacted for an interview with the selection committee.

Nuclear Security Clearance

May 1, 2023 – June 30, 2023

Successful candidates will be required to complete a nuclear security clearance (including police background check).

Temporary Work Placement

Training Begins: October 2023.

Anticipated 4 month duration of work

Selected candidates will be added to a list for dispatch to a temporary work opportunity with Aecon, who is performing critical work on the Darlington Refurbishment Project. Boilermaker Helpers will be required to complete all paid orientations, training and evaluations deemed necessary by Aecon. When a Helper is no longer required as per schedule, demand, or due to reaching their individual permissible radiological exposure limit, they will receive a layoff without the expectation of any additional employment.

Benefits to being a Boilermaker Helper:

- ▶ *No Boilermaker qualifications needed*
- ▶ *Competitive Rate of \$33.48/Hour*
- ▶ *Health Care spending account and pension account contributions*
- ▶ *Nuclear Security Clearance*
- ▶ *Experience working with trained Boilermakers*
- ▶ *Safety Training and Skills Training*
